

Project funded by the European Commission under the Life programme
LIFE19 ENV/ES/000283

infusion

Intensive treatment of waste effluents and conversion into useful sustainable outputs: biogas, nutrients and water

MAIN PROJECT GOALS

Recover energy, nutrients and water from landfill leachate and OFMSW liquid digestate

Demonstrate social, economic, technical and environmental feasibility of the INFUSION solution

Reduce the environmental impact in MSW treatment facilities

Disseminate the results and extend the process to other sectors
